

► Mobile Road System

■ MRS - Super Heavy H

► Properties

- Compression molded high-performance thermoplastic material
- Robust, durable and high-performance products
- Overlap system for interlocking connection, for creating routes and work areas
- Highly efficient weight distribution
- Protection of sensitive ground
- Simple and durable connection system

Material: polyethylene, high molecular weight

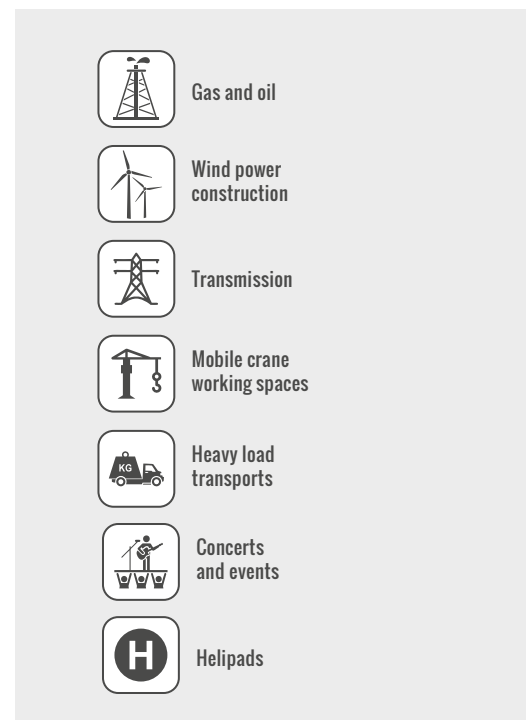

Dimensions: 4200 x 2200 x 102 mm (incl. profile) **Overlap Edge:** 200 mm

Weight per panel: approx. 409 kg

Surface / colour: 3.0 & 3.0 mm profile / black, yellow

Load capacity: approx. 415 t (depending on the ground conditions)

Transport per truck: 55 units (440 m²)

- Developed for **extreme construction projects**. Good performance features and high strength guarantee a **stable** and **even load distribution** - even under the most difficult conditions. The surface design of the products optimizes the **traction** and **safety** of construction vehicles or trucks. The connectors prevent the panels from moving.
